## **Abstracts**

- (1) Knowledge Management
- (2) “Surviving and Thriving” as an IS Professional

Knowledge Management (KM) means different things to different people and can be researched in many different ways. This seminar will be divided into two inter-related parts. Examples of different projects in progress will be used, in the first part of the seminar, to illustrate opportunities for KM research using a variety of methodological approaches. Issues will be discussed and lessons learned so far will be provided with particular emphasis on future research opportunities. The second part of the seminar will focus on “surviving and thriving” as an IS professional with special attention to balancing multiple demands associated with our discipline.

## **Short Bio of the Speaker**

Douglas R. Vogel is Professor (Chair) of Information Systems at the City University of Hong Kong and an AIS Fellow. He received his M.S. in Computer Science from U.C.L.A. in 1972 and his Ph.D. in Business from the University of Minnesota in 1986. Professor Vogel has published widely and directed extensive research on group support systems and technology support for education. He has been ranked 3rd in a journal report of top researchers in Group Support Systems and ranked 10th in a worldwide list of top researchers in MIS as well as 4th in the list of most collaborative information systems researchers. Professor Vogel is especially active in various aspects of knowledge management including introducing group support technology into enterprises and researching mobile applications.
